

Ingress Setup

Client

Client  
Requests for

services in Kubernetes are exposed with ingress controllers for safety and security. They also allow for multiple services to be exposed on one ingress controller

Control Plane  
Nodes

Suzaku

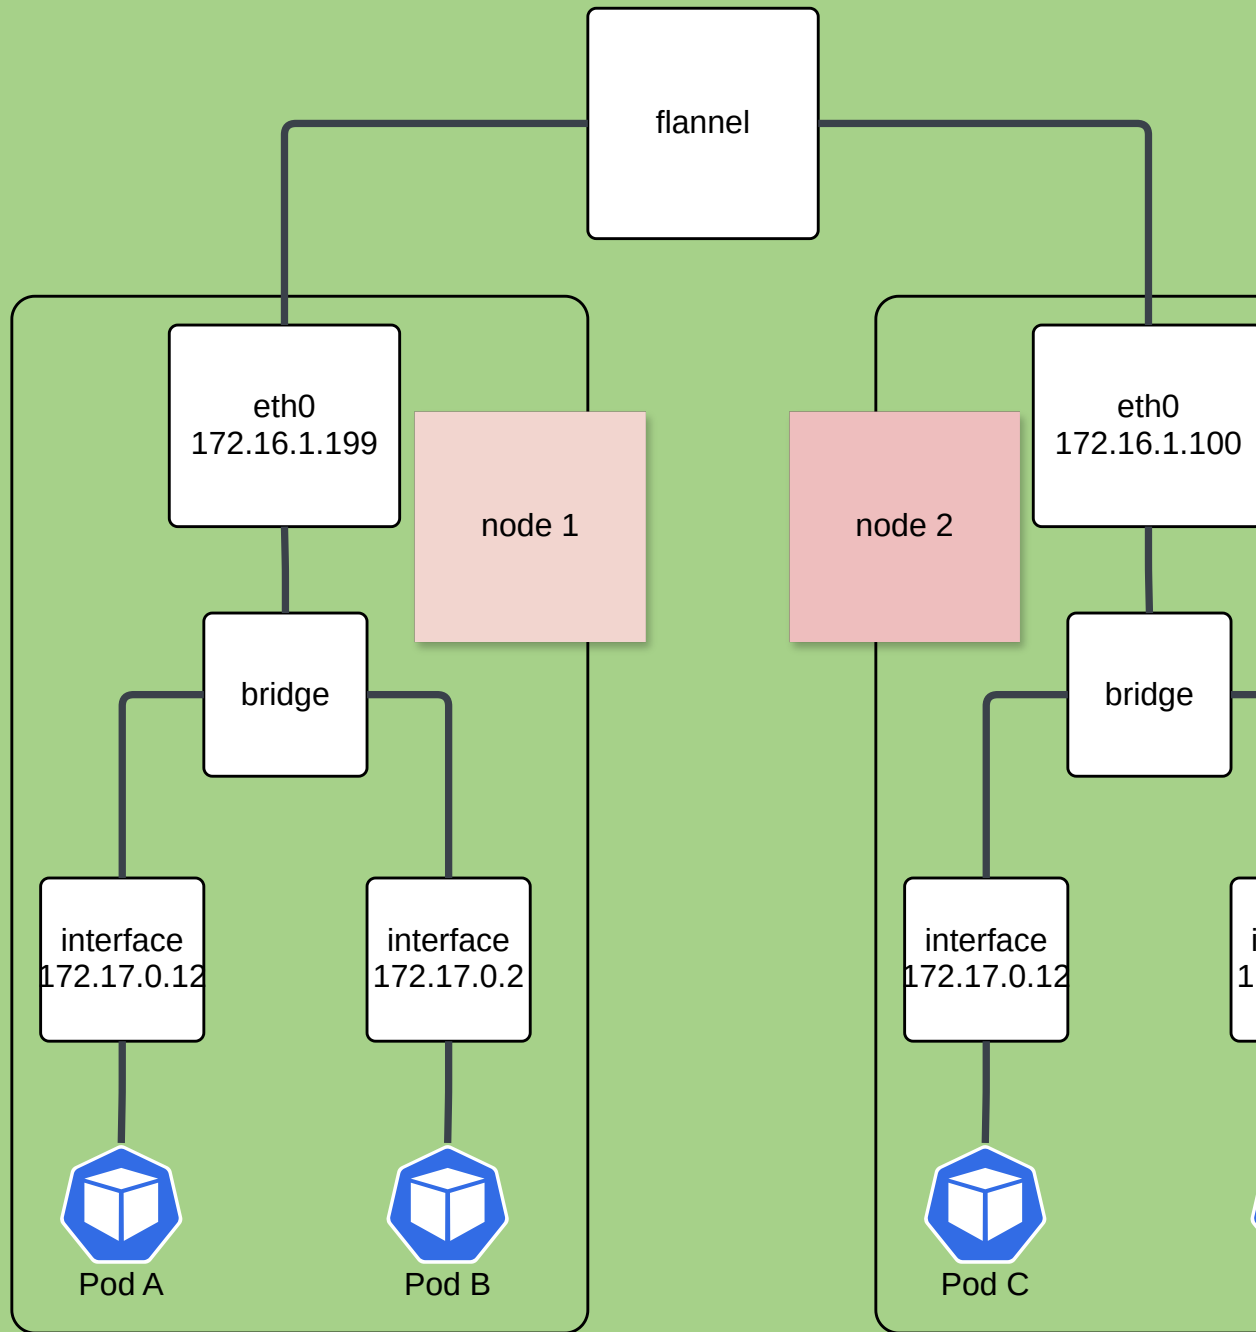

Amun

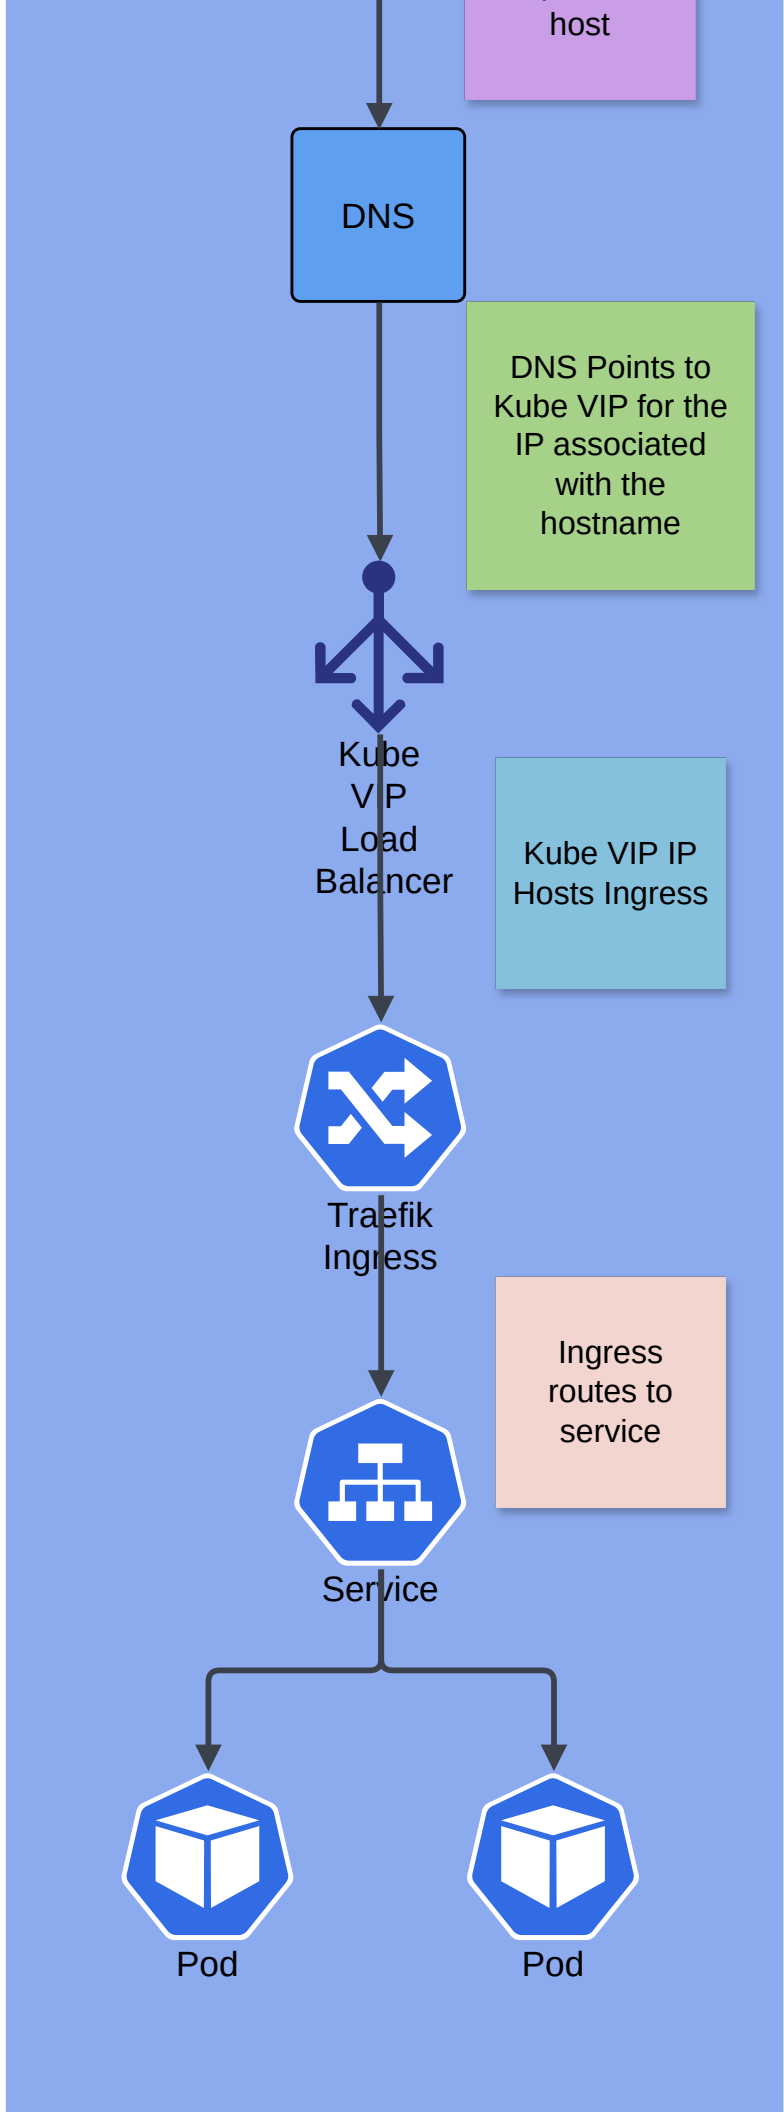

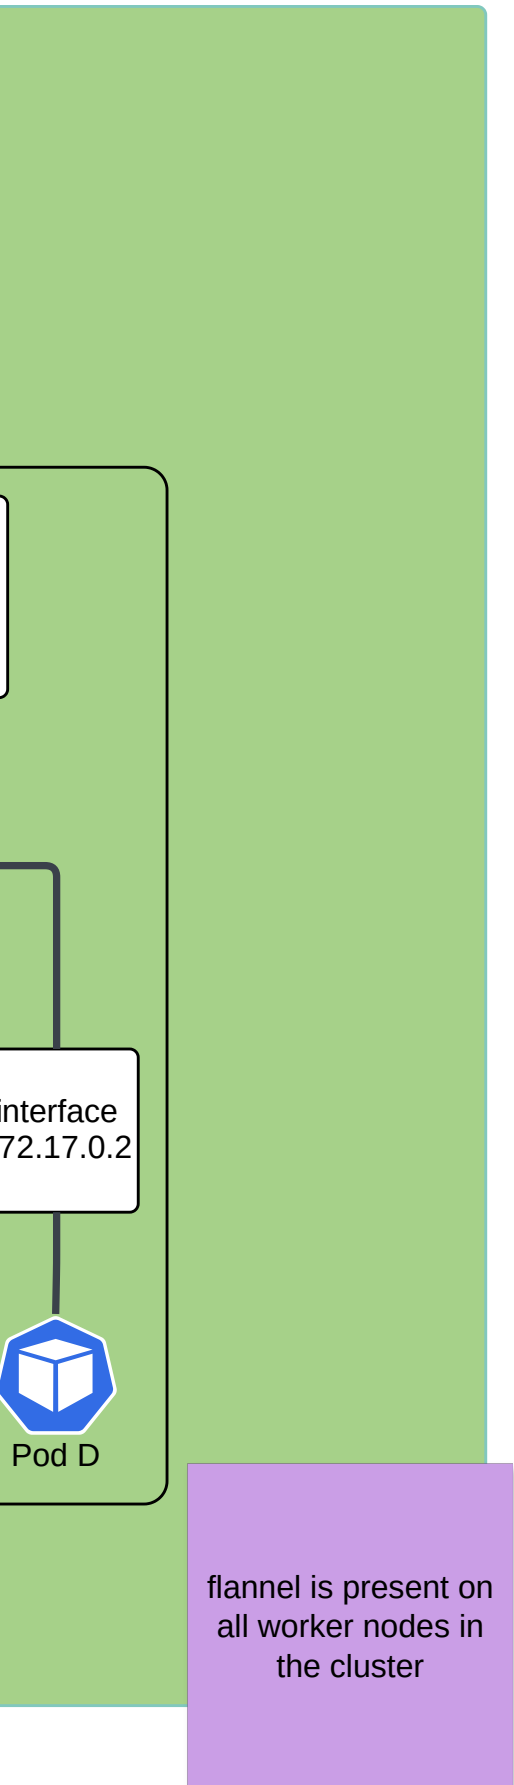

Cyberman

All control  
nodes are  
currently also  
worker and  
etcd nodes

## Flannel Networking with VETH

Kube VIP IP (10.3.21.1)
